ROOF SYSTEMS**

# A ROOF SYSTEM FOR ANY APPLICATION

## USA Guardian-Lok

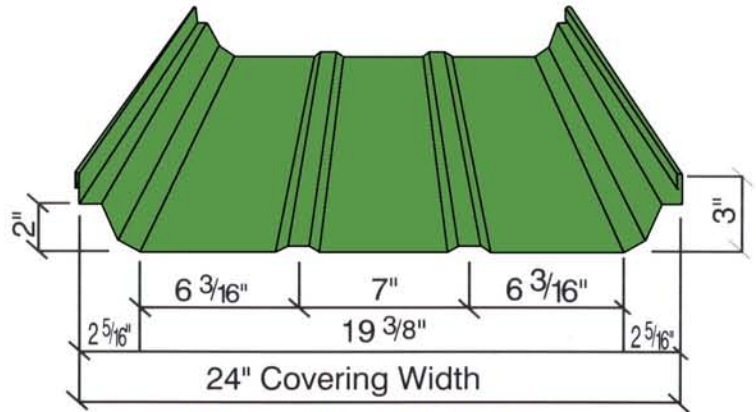

The USA "Guardian-Lok" system matches the profile of USA "Guardian" but is mechanically seamed with a 360-degree rolled connection. This panel is also available in 18" panel widths. Both widths are available in the same finishes offered with the USA "Guardian" system. USA "Guardian-Lok" panels meet Corps of Engineers uplift test CEGS07416 and are Factory Mutual windstorm rated.

**Guardian-Lok Profile**

## USA Guardian

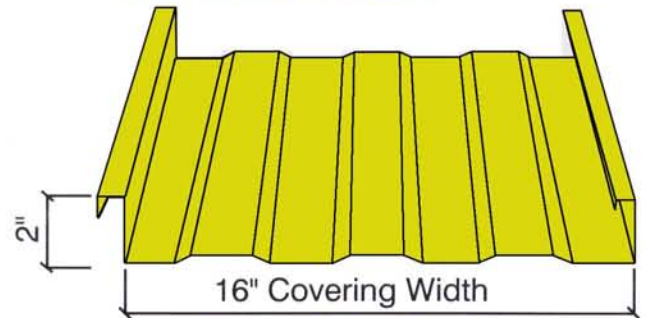

The USA "Guardian" system is a 24" wide, 3" high snap-seam panel system. USA, Inc. offers this panel with Aluminum-Zinc finish or in a choice of Unico 3000 (Kynar 500) colors. The panel is available with three clip choices: fixed, floating or articulating. The panel system meets a number of UL certified constructions and meets ASTM testing for air infiltration and water penetration.

**Guardian Profile**

## USA Sure-Lok

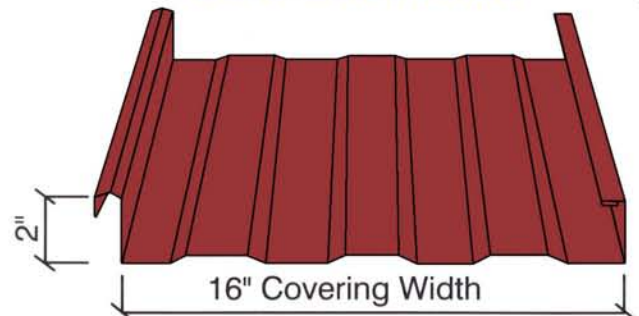

The USA "Sure-Lok" roof system is an architectural profile panel with structural capacities. The panel is 16" wide with 2" high ribs that are mechanically seamed. The panel is tested for uplift by UL for various construction applications. The USA "Sure-Lok" system can be designed for an eave turndown construction to provide a continuous appearance from the ridge to the fascia.

**Sure-Lok Profile**

## USA Supreme-Lok

The USA "Supreme-Lok" is the same pleasing profile as USA "Sure-Lok" but with a 360-degree seam. Both panels are available in a number of USA Unico 3000 Color (Kynar 500) finishes. The USA "Supreme-Lok" panel system has ASTM 1592-95 uplift approval as well as Factory Mutual windstorm ratings.
