
SELF STORAGE FACILITIES

FROM

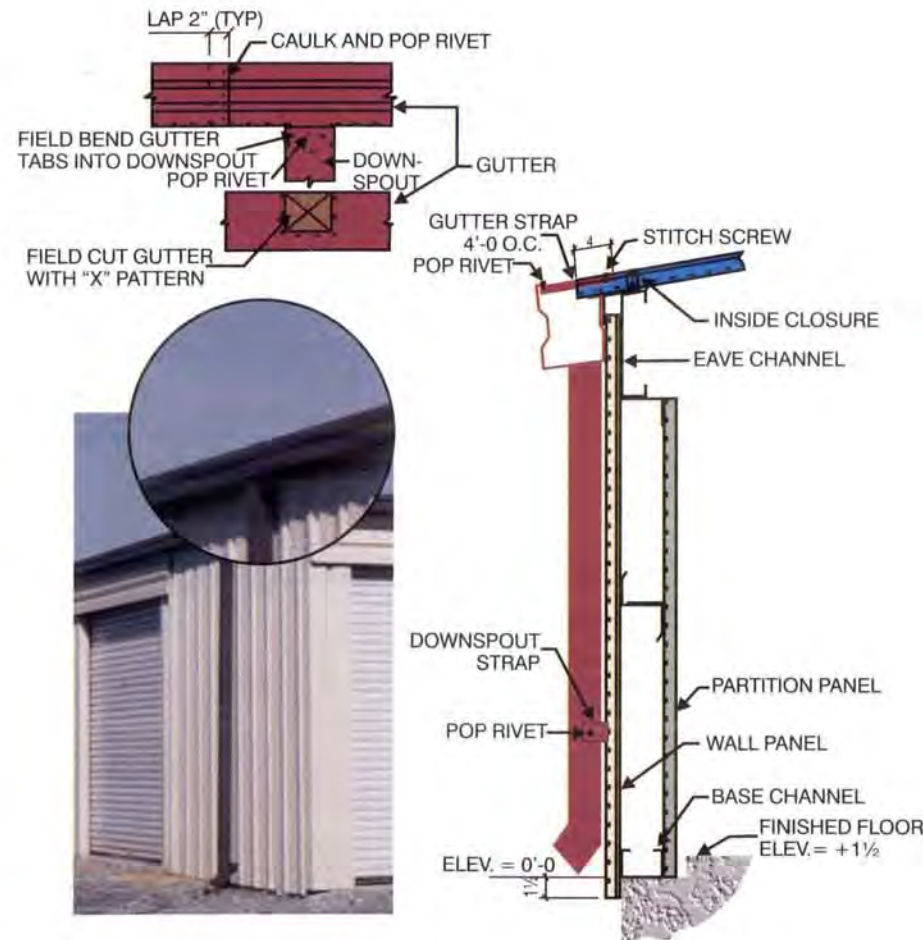

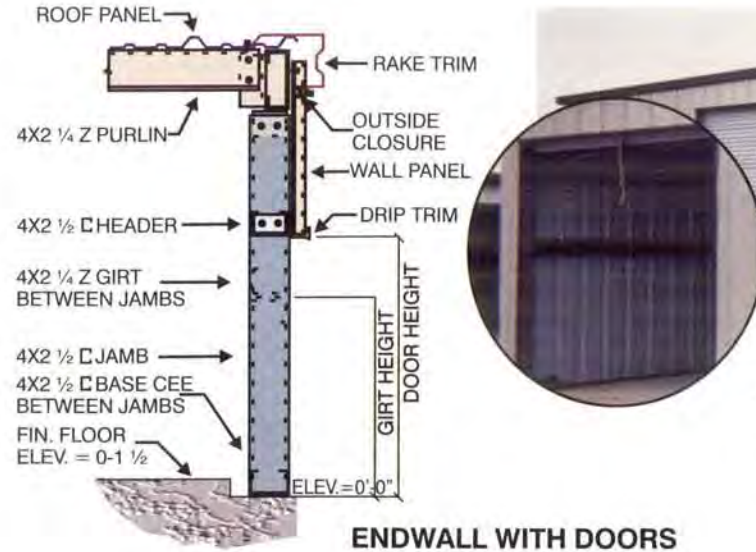

**UNITED STRUCTURES
OF AMERICA,
INC.**

System Adaptability...

is USA's key to fast erection in self-storage facilities. USA mini-storage buildings go up fast because they can be designed to produce a storage project to fit your exact needs. Speed of erection not only puts you in business more quickly, but can save you on labor costs. Today's trend toward two story construction gives better utilization of expensive urban property.

Design flexibility and adaptability allows you to get more rentable space into your project. USA buildings have low maintenance requirements thus assuring you of more long term profit.

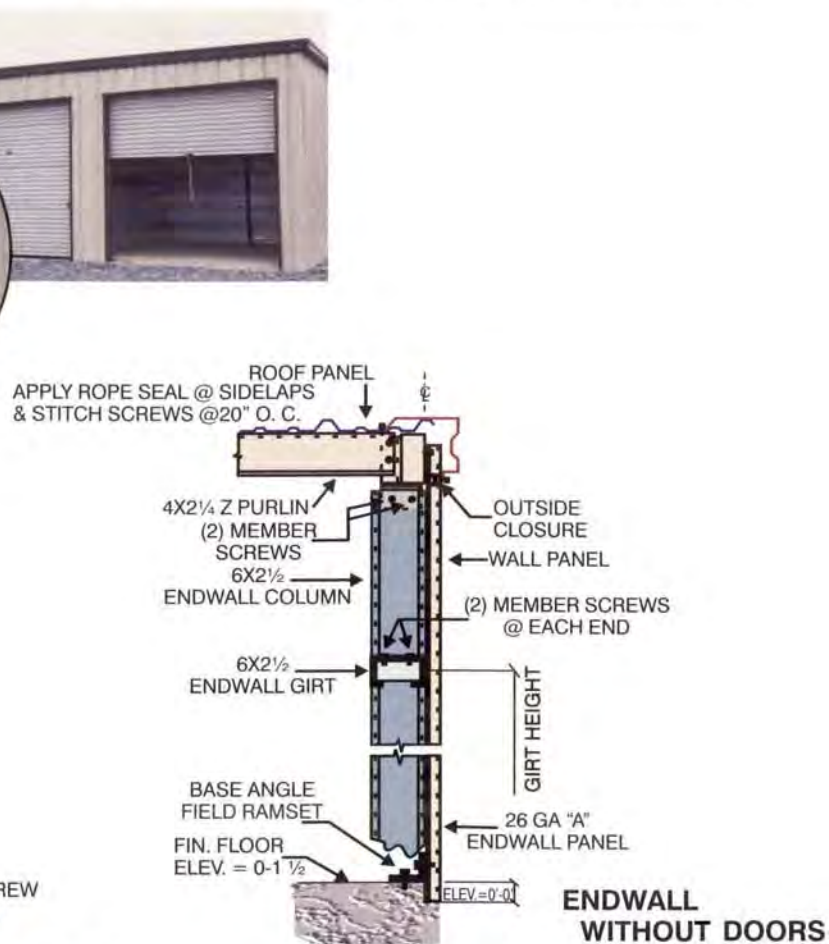

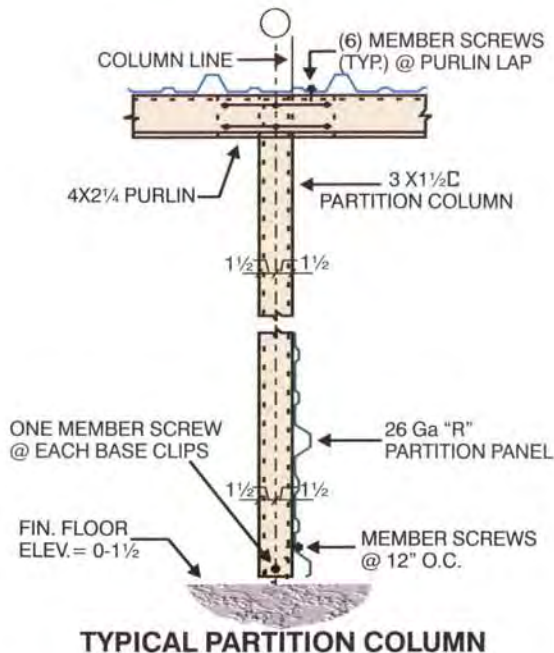

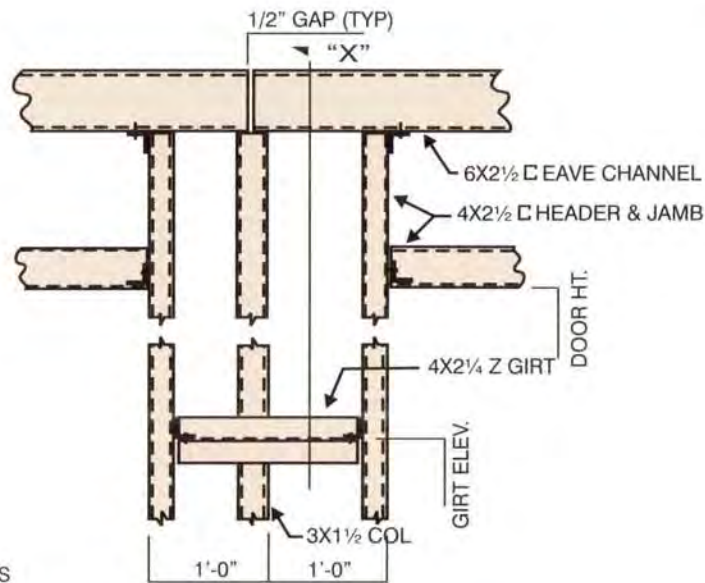

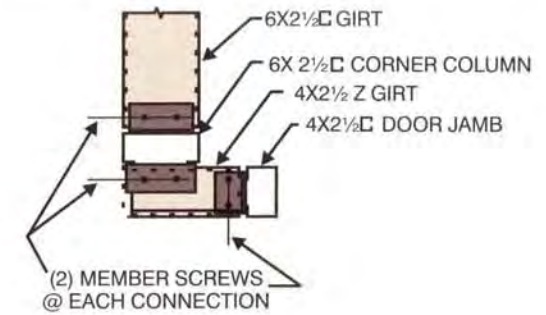

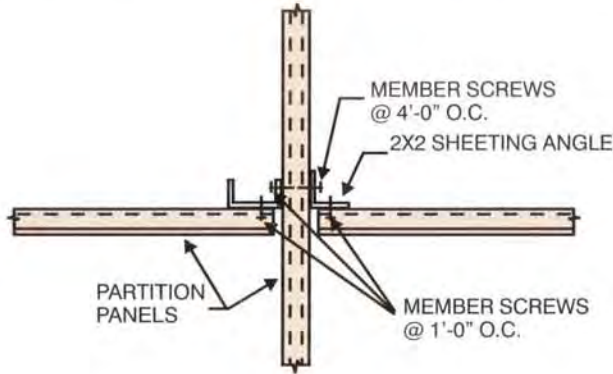

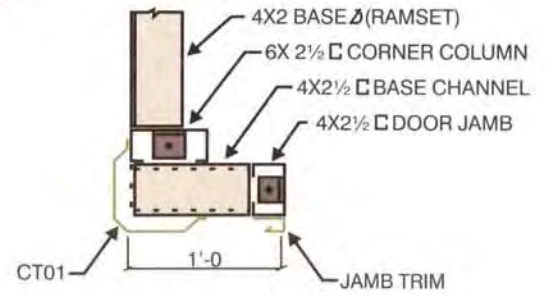

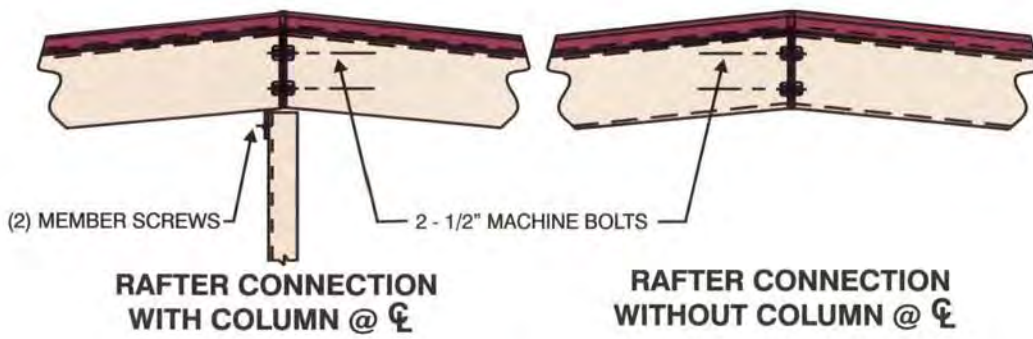

Trust the USA Team

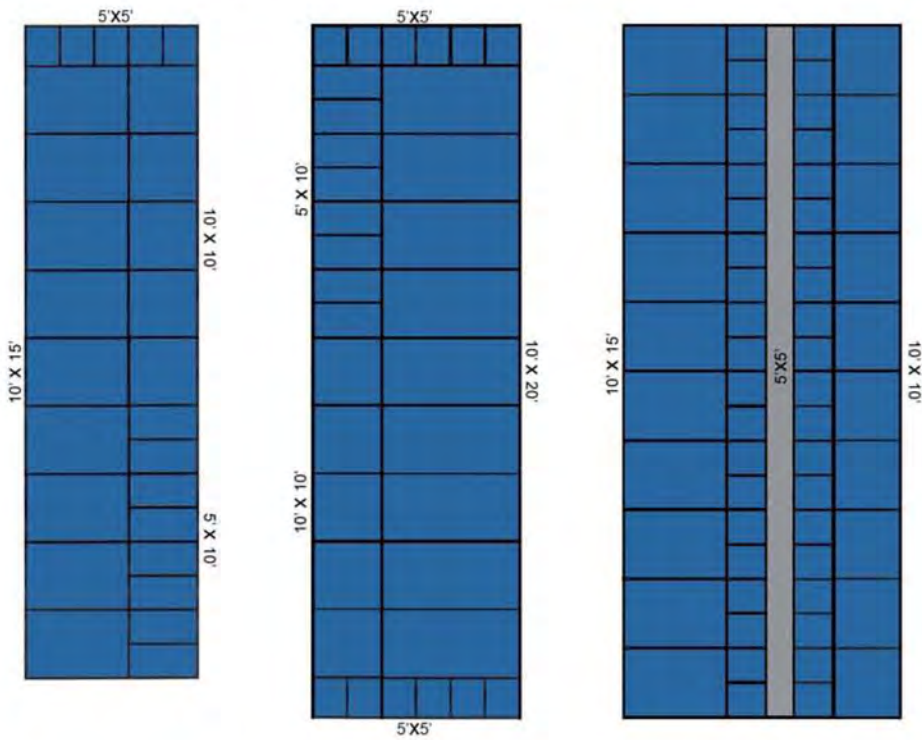

We take a team approach to all our projects. You can trust your USA Builder. He is an independent businessman selected for his experience in construction, management ability, financial responsibility and dedication to getting the job done right.

Through close planning with you on all phases of your building program, your USA Builder can make your project a success while saving you money every step of the way.

When your building a mini-warehouse, make sure you get the best, in quality, service and value. Get the most from your investment dollar. Call your local USA builder.

With almost limitless floor plan variations of Self-storage structures available from USA, space utilization can be designed to optimize land usage areas for the greatest return on your investment dollar.
